PROFESSIONAL SUMMARY

Motivated and eager Computer Science student seeking an On-the-Job Training opportunity in Full-Stack Development or Software Engineering. Experienced in building web-based applications using React.js, Node.js, JavaScript, PHP/Laravel, PostgreSQL, Python, and Firebase through academic and self-made projects. Passionate about building practical, user-focused applications that solve real problems — particularly for students and everyday users.

PROJECT HISTORY

Point of Sale System — Frontend Developer

Java (Swing/AWT), Excel (Database Integration), Apache POI

- Designed and developed a fully interactive desktop GUI to modernize retail transactions, order processing, and inventory tracking.
- Implemented core user-facing interfaces including a dynamic vendor dashboard, secure multi-user login pages, user registration modules, and product management screens.

Sociatech — Full-Stack Developer

PHP, React.js, MySQL (Database Integration), CSS, Firebase (Authentication)

- Built a containerized digital platform combining the collaborative features of Brainly, Reddit, and Facebook for online learning and social networking.
- Developed core full-stack features: secure signup with email verification, profile customization, and post drafting/publishing.
- Built a responsive UI with JavaScript and the fetch API for real-time community engagement and administrative actions without page reloads.
- Handled audit logging, user blocking, and a content reporting system to maintain platform safety.

CiviReport — Mobile & Web Admin Barangay Issue Tracking Platform — Full-Stack Developer

Laravel (Jetstream)/PHP, JavaScript, Python, CSS, PostgreSQL (Database Integration), WebSocket

- Developed the web-based admin platform using Laravel (Jetstream) and PostgreSQL, replacing manual, paper-based complaint processes with a structured digital system.
- Implemented complaint submission, real-time queue visibility, status tracking, and audit logging.
- Integrated an AI-based urgency classification module (Python) to prioritize complaints and suggest recommended actions to residents.
- Built a FastAPI service layer connecting the admin web platform with the mobile resident-facing app for real-time data sync.

BarangayPaws — Mobile & Web Admin Pet Registration — Full-Stack Developer

Laravel/PHP, Firebase (Database Integration), Cloudinary (media API), REST API

- Developed a commissioned web-based admin platform using Laravel and Firebase to replace paper-based pet registration, handling approvals, vaccination/deworming records, announcements, and PDF report generation (RA 9482 compliance).
- Built an age-based health scheduling module that auto-computes vaccination and deworming timelines, with Cloudinary for photo uploads and an admin-verified photo change workflow.
- Connected the Laravel admin platform with the Android app via Firebase for real-time sync, with role-based access control for RA 10173 compliance.

LEADERSHIP AND ORGANIZATIONAL EXPERIENCE

Exploring the New Digital Era

May 10, 2024

- Learned how hacking works and what we can do to protect our data.
- Learned how the Cloud works.

Creatives Head — PCU-M Society of Computer Technologists

2024 – 2025

- Created pubmats for events, announcements, and more.
- Assisted in budget planning and allocation for students.

- Managed a Grade 12 Summit booth for Computer Science.

BootUp: Computer Science Skills Intensive

October 1, 2024

- Built a web-based CRUD management system using PHP and MySQL.
- Learned data modeling in Power BI and created interactive visualizations.
- Built a real-time object detection project using Roboflow and a smartphone camera.

Vice President-External — PCU-M Society of Computer Technologists

2025 – 2026

- Managed and monitored organizational funds and financial records.
- Managed the Grade 12 Summit booth for Computer Science.
- Ensured transparency and accuracy in financial transactions.
- Managed seminar events.

Gen AI to Z: A Career Summit in an AI-Driven World

March 17, 2026

- Leveraged generative AI tools and prompt engineering for media production.
- Adopted an agent-first "VibeCoding" workflow to rapidly prototype and debug apps.
- Researched real-world AI case studies in investigative journalism and aerospace.

EDUCATION

Bachelor of Science in Computer Science · 2023 – Present

Philippine Christian University — Malate, Manila

Senior High School · 2020 – 2023

Jesus Reigns Christian Academy — Malate, Manila

TECHNICAL SKILLS

Frontend: HTML, CSS, JavaScript, React.js, TypeScript, Bootstrap, Next.js

Backend: PHP, Python, Laravel/PHP, Node.js

Database & Cloud: MySQL, PostgreSQL, Firebase, MongoDB, Cloudinary, AWS

Tools: Git, GitHub, VS Code, Figma, Canva, Docker

Languages: Filipino (Native), English (Conversational)

Interests: Web Development, Full-Stack Development, Software Engineering
